Number	responsible solver	project duration	goals
D189/2017/13	PaedDr. Terézia Strédl, PhD.	1/2017 - 12 /2017	As part of the project, a workshop will be held, which will be an opportunity to build the competencies of teachers needed for education for tolerance. The aim is to support university students in building their social competencies. UJS students' research aimed at finding out their opinions about prejudice, discrimination, cooperation.
VEGA 002UJS-4/2016	Mgr. Katarína Szarka, PhD.	1/2016 - 12/2018	The main goal of the project is to innovate educational forms and methods of training future teachers at FE JSU through web-based applications, support their orientation in the rapidly developing world of the information society and facilitate the process of integration into the online community. Another effort is to bring the pedagogical-didactic interests of future teachers closer to the interests of the young generation as well as to find a common platform for a new learning environment through web-based applications.
KEGA 005UJS-4/2015	Ing. István Szókö, PhD.	1/2015 - 12/2017	The main goal of the project is to internationalize and improve the teaching of the study program preschool and elementary pedagogy for II. degree of university studies at the Faculty of Education JSU. The project focuses on the development of teaching materials in English to make this study program accessible to students from abroad.
